Project Description

Improved Traceability of Health & Wellbeing of Stock for report back to owners

Project Content

Improved welfare of animals being slaughtered and feedback on quality of stock being produced.

Project Outcome

Hoping for a better product by providing feedback to farmers to enable them to improve livestock production and welfare at the farm gate.

Benefit for Industry

Better stock quality with less condemnation of carcasses and reduction of diseased carcasses.

Stock Quality

By issuing relevant information to growers, we are able to inform the grower of basic manageable diseases such as nephritis and pleurisy

Full Traceability

With full traceability of RFID tags, more exotic diseases such as footrot and foot and mouth disease, enables early detection and traceability back to the original source.

Thus making quarantine of diseased animals quicker and easier.
